

# Portable Eye Wash Set

**Abstract:**

The portable eye wash set can assist daring exhibition spaces where high risks otherwise associated with high school science labs might arise. Let's rinse!

**Technical description:**

Essential for where ocular risks can occur, the sets are made up of an eye-wash container and a storage pocket each. The eye-wash container has an ergonomic eye-piece that facilitates opening of the eye and allows direct rinsing and drains the liquid to avoid eye infection.

**Placement:**

Will be best decided about by the organisers as we have absolutely no idea about "the lay of ... land". We will be more than happy to credit actual person(s) contributing.
